DETAILED ACTION

Response to Amendment

1. This action is in response to amendment filed October 19, 2006.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Omar Galaria on November 7, 2006.

The application has been amended as follows:

Withdrawn claims 7-21 have been cancelled.

3. Claims 1-3, 5, & 22-29 are allowable over the prior art.
4. The following is an examiner's statement of reasons for allowance:

With respect to claims 1 & 27, US 6,842,290 B2 to Liang et al discloses imaging systems comprising imaging detector arrays with corresponding microlens arrays. Liang et al disclose the lateral and longitudinal translation of individual lenses through the use of individual actuators (see column 4, lines 35-39). US 6,884,985 B2 to Raynor discloses array of microlenses (14) being disposed on pixels (16) with the capability of individually actuating the lenses. However, neither Liang et al nor Raynor disclose or suggest the use of a processor to communicate with the actuators in order to determine the direction at which the light is incident upon the light detectors. As a result,
